

THERMOSTATIC HEADS

The thermostat heads are mechanical devices for automatic control of the water flow to heating units, thanks to a heat-sensitive element that reacts to the variations in the room temperature.

A wide range of IVAR thermostatic valve models bear the mark Keymark EN 215, which guarantees conformity of the low thermal inertia system (response time < 40 min). The same systems are accompanied by the TELL energy label. Eurovent Certita certification is also available for numerous thermostatic valves with the T 5000 head.

The heads in the 5000 series are fitted with a liquid element and offer the possibility of limiting and blocking settings. They can also be selected with remote sensors to avoid the problem of obstacles in front of the radiator, and ensure optimal detection of the room temperature.

T 1500 (equipped with a liquid sensor) and T 1000 (equipped with a wax sensor) heads have a compact size and a simple line; they are particularly suitable to regulate water flow to the radiator when detection of ambient temperature does not need to be remote controlled.

Materials

Knob and body: ABS

Thermostat: liquid expansion (series 5000; T 1500); wax expansion (T 1000)

Technical specifications

Max. fluid temperature inside valve: 100 °C

Parameters according to EN 215 (T 5000 and T 1000 only)

Hysteresis: 0.5 K (T 5000); 0.65 K (T 1000)

Influence of pressure differential D: 0.25 K (T 5000); 0.40 K (T 1000)

Effect of water temperature W: 0.75 K (T 5000); 1.20 K (T 1000)

Response time Z: 30 min (T 5000); 22 min (T 1000); < 40 min (others)

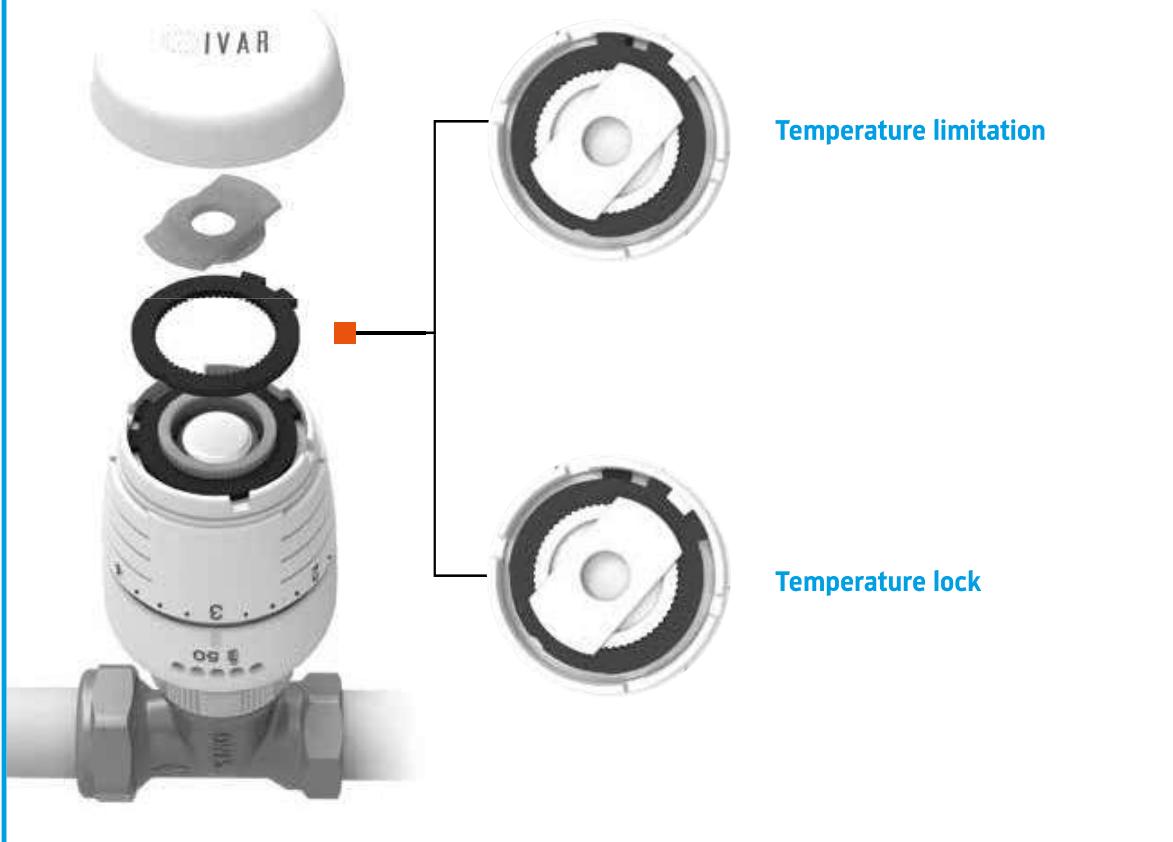

PLUS

- No temperature imbalances in rooms
- Better regulation accuracy
- Lowered return temperature, with a significant increase of condensing boiler efficiency
- Available with anti-tamper ring nut and temperature limitation/lock functions 
- Liquid expansion sensor 

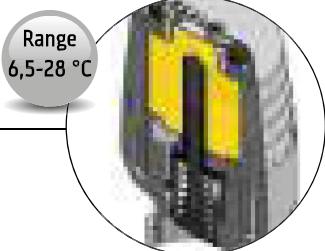

FOCUS 1: Temperature limitation and lock

FOCUS 2: Liquid expansion sensor

T 5000

LIQUID SENSOR

Sensitive element that reacts to the variations in room temperature (expanding or retracting) to activate movement of the shutter rod. The thrust on closure is applied thanks to expansion of the sensor element, while the thrust on closure is applied by a counter-spring.

Available with remote capillary sensor

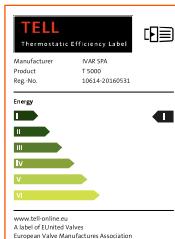

T 5000

- Testa termostatica con comando e sensore a espansione di liquido incorporati. Isteresi 0,5 K.
- Thermostatic head with incorporated command and liquid expansion sensor. Hysteresis 0.5 K.*
- Tête thermostatique avec commande et senseur à expansion de liquide incorporés. Hystérésis 0,5 K.
- Thermostat-Kopf mit eingebauten Steuerung und Flüssigkeitsausdehnung Fühler. Hystere 0,5 K.*
- Cabeza termostática con mando y sensor de expansión de líquido incorporados. Histéresis 0,5 K.
